

KEEP YOUR HOME **SAFE Online**

Block
PORN
Gambling
Violence
Drugs
Adware

Traditional Solutions:

- Has to be installed on every computer
- You have to make sure it's running and updated on every device
- Easy for anyone tech-savvy to by-pass
- Slows down your computers and conflicts with other software
- Hard to keep up with new porn sites coming out regularly
- Doesn't protect smartphones, tablets, laptops, etc. that friends bring over
- You have to purchase yearly subscriptions

Our Solution:

- Blocking happens at the router, where the Internet enters your home
- You do nothing - we setup the device and that's it
- Nearly impossible to bypass
- Never slows down your computers or conflicts with other software
- New sites are added to blocked list automatically and seamlessly - you do nothing
- Every device (smartphone, tablet, laptop, etc.) that is connected to your Internet is automatically protected with **NO SOFTWARE** installed on the device!
- One-time setup fee - that's it!

My name is Mark Sohmer, and I'm a Missionary providing this service to serve families as well as help fund our evangelism work. I use this solution at my home to protect my kids.

On Mission Technical Services

Helping Families Use Technology to the Glory of Jesus Christ!

Please visit <http://Luke-15.org> to learn about our Frontline Evangelism work.

We also do all types of Computer, Network, Backup, Technology repair and maintenance. Please contact Mark for info on making the Internet safer at your home or business! 603-244-6292 or mark@Luke-15.org

Does this work with all Internet Providers?

Yes! I install a device that is compatible with all Fiber, Cable, DSL, and Satellite Internet Providers. It connects to the “modem” that your Internet Provider put in your home.

I have my own Wi-Fi Router. Will this still work?

Yes. In most cases, our device replaces your Wi-Fi Router, but that’s good news because you’ll likely notice stronger Wi-Fi signals and **better Internet performance**.

What if I don’t live near you?

That’s okay! I can do most of the install at my home, then I ship the device to you. You plug it in with me instructing you over the phone, and then I finish the install remotely over the Internet.

What if sites I like get blocked?

No problem. If sites you need are blocked, they can easily be added to an “allow access” list.

Does this protect all my devices?

Yes! Every laptop, desktop, Windows, Macintosh, Linux, tablet, smart phone, iPad, Kindle, anything and everything that attaches to your network **AUTOMATICALLY is protected from pornography sites** without any software being installed on your devices!

What else can you do?

I can setup your network so that the Internet is shut off at a certain hour and automatically turns back on at a set time in the morning. I can also setup a “guest” network so that people who visit your home can get online, will be protected from bad websites, but don’t learn your Internet password and are firewalled from your personal data. **No extra charge for any of this!**

Any additional benefits?

Yes! I’ve found that many people have their network setup poorly so that savvy neighborhood kids can break in. **I’ll use my 20+ years experience in the IT Industry to make sure your network is configured the right way to protect your family.** You don’t have to know any technical geekery!

How much does this cost?

There is the cost of the Internet device. I make no money off this. The models range from \$30 to \$170. Rather than make my fee complicated, **I charge a flat fee of \$150** for me to setup your device, make sure your network is secure, and make sure your pornography filtering is setup properly. I also work with your Internet Provider if needed so you don’t have to. I setup your network and customize your site blocking for no extra charge! Others charge you a monthly or annual fee. We don’t! Once you pay for this, **there are no recurring fees for the content blocking!**

And You’re a Missionary?

Yes, I’m a full-time Missionary, but not yet fully supported financially. The technical work I offer is a win-win for everyone. **Families are protected from destructive pornography**, and the vital front-line evangelism work is funded. Please visit **Luke-15.org** to learn about our Missionary work!

Are you and your kids safe online? Please let me help you be protected!!!
